ABOUT ME

Analytical and detail-driven, I am passionate about using data to solve real-world problems and build smarter, more efficient, and sustainable systems.

TECHNICAL SKILLS

MS Office:
Advanced Excel, Pivot Tables, Forecasting Tools

SAP:
SAP S/4HANA Cloud, Agile & Waterfall Methodologies

Data Analysis:
R (Clustering, Statistical Modeling), Python (Pandas for visualisation)

Supply Chain:
Performance Monitoring, Analytics, Cost Analysis, Digitalization (KPI Dashboard Development), DMAIC, SPC, Demand Forecasting, Inventory Planning

INTERESTS

Swimming, Reading, Hiking, Public Speaking and Cricket

LANGUAGES

Hindi/Urdu: Native
English: C2/Bilingual
Italian: B1 (In Progress)

WORK EXPERIENCE

AI Data Specialist Mar 2026 – Present
Stellar AI – Remote Freelance/Contractual

- Execute structured data annotation and evaluate complex models to ensure system outputs adhere to strict ethical, legal, and safety standards.
- Apply systematic quality assurance and reinforcement learning methodologies to enhance reasoning capabilities and operational accuracy.

Data Quality Specialist Nov 2025 – Present
Alignerr (ATC Reviewer) – Remote Freelance/Contractual

- Audited and validated high-precision transcriptions of Air Traffic Control (ATC) communications to ensure 100% compliance with strict labeling guidelines.
- Reviewed AI-labelled data for accuracy in phonetic transcription, callsign identification, and speaker diarization (ATC vs. Pilot)

Senior Operations and Logistics Officer Jul 2022 – Sep 2023
Oceanic Star Line (Pvt) Ltd (Oceanic Group) - Karachi, Pakistan

- Automated an Excel-based shipment tracking system, cutting manual data entry time by 40% and enabling real-time visibility across the operations team.
- Designed and implemented a global SOP for empty container repositioning using one-way lease and interchange swap strategies, reducing repositioning costs and improving asset utilisation.
- Coordinated depot partner reviews for maintenance & repair (M&R) estimates, ensuring 100% ISO safety compliance before containers were released for customer bookings.
- Led cross-functional stakeholder training to onboard the new tracking system, ensuring smooth adoption across operations, commercial, and finance teams.
- Monitored real-time lifecycle status of a 20,000+ container fleet using NVOCC logistics software, tracking movements across the Middle East and Europe.

INTERNSHIP

Supply Chain Management Intern Jul 2024 – Sep 2024
O.V.S. Officine Valle Seriana - Bergamo, Italy

- Engineered Excel KPI tracking dashboards that automated data collection across the supply chain, increasing reporting transparency for management.
- Conducted ESG-based vendor assessments for 100+ suppliers, evaluating environmental and social compliance criteria to support responsible sourcing and reduce supplier risk exposure.
- Identified key bottlenecks in procurement and inbound logistics workflows through cross-functional collaboration with production, commercial, and operations teams, contributing to improved on-time project completion rates.

EDUCATION

Masters in Economics, Management and Policies for Global Challenges Sep 2023 – Dec 2025
University of Ferrara - Ferrara, Italy

Thesis: AI-Driven Digitalization and Sustainable Practices in Manufacturing

- Applied clustering techniques in R (K-means, hierarchical) for comorbidity analysis in a healthcare dataset, demonstrating proficiency in statistical segmentation methods transferable to supplier and demand analytics.
- Led case study on “Regional Strategy and Ecosystem Dynamics in Hesse's Space Sector”, analysing cluster strategy, stakeholder coordination and regional competitive advantage.
- Applied AI in Logistics module: led case study on Della Rovere Srl, mapping AI adoption opportunities across their logistics and operations workflow

Erasmus Exchange Program Oct 2024 – Mar 2025
University of Wurzburg - Wurzburg, Germany

- Global Logistics & Supply Chain Management, and Python for Data Science

Bachelors in Public Administration Nov 2018 – Apr 2022
University of Karachi - Karachi, Pakistan

- Major: Supply chain management
